

Position: Project Consultant

Division: Transport and Urban Governance Division

Position Overview:

TERI is seeking a **Project Consultant** to join the Transport and Urban Governance team in New Delhi, India. This position provides a unique opportunity for those willing to work with ministries, urban local bodies, policy thinktanks, research institutions, embassies, and multi-lateral organizations to facilitate the technical and capacity building assistance required for developing sustainable, smart, and resilient cities.

The candidate will be a part of the project, Integrated Urban Climate Action for Low-Carbon and Resilient Cities (Urban-Act). They will be responsible for research collection and analysis in the project associated cities, outreach activities, and provide technical inputs as per requirement. The candidate is also required to carry out the fieldwork as per requirement of the projects.

Job Description:

- To conduct strategic planning, research and data collection activities for themes related to climate science, climate mitigation and adaptation, sustainable urban development and urban governance.
- To develop and contribute towards knowledge products, including policy briefs, working papers, research proposals, journal articles, and blogs.
- To develop outreach content, such as for social media, websites, newsletters, press releases and any other channels to deliver the project content and ensure visibility; and to ensure accurate branding across all communication material as per requirement.
- To plan, manage, and coordinate project events, such as stakeholder consultations, training workshops, conferences, and knowledge product dissemination.

Core Competencies:

- A firm grasp of qualitative and quantitative research skills and data analysis in the urban development, governance and climate resilience fields.
- 1-3 years of relevant professional experience of working in reputed public/private sector agencies, with national/international development organizations, research/policy thinktanks, or with multilateral/bilateral institutions.
- Proficiency in conducting risk analysis for informed decision-making.
- Adequate knowledge of municipal bylaws and city level climate assessment frameworks.
- Ability to work well with teams, and work responsibly and flexibly, take initiative, and generate new ideas.
- Proficiency in English and Hindi. Proficiency in any other national/international language is an advantage.
- Comfortable with domestic travels as per requirement

Qualification: Master's degree in Climate Sciences/ Urban Planning/Urban Development/Sustainable Development/ Public Policy any other relevant social sciences field.

Location: New Delhi

Duration: 1-2 years
